OD4 II hodina 7 čtvrtek 2026 (hodina 5 pátek)

1) Checked WB 48 49, revised SB 58 59 - reading: From the world to your table checked SB 60 presentations

2) discussion – we looked at samples of food that one may buy in Kladno and discussed whether they:

are produced or grown locally / organic / full of chemicals / full of vitamins

involve a lot of processing and packaging / a lot of „food miles“/

have convenient packaging / have too much (unnecessary) packinging /

could be replaced by environment-friendlier alternatives

Homework:

CHOOSE 3 items from your cupboard / fridge / pantry / , put them on a table and take a photo.

(Bring the photo in your smart-phone or **send** it to my whatsap)

Write 3-5 sentences **about each** item –

a) describe what it is

b) say how environment-friendly (or unfriendly) it is

c) if it is environment-unfriendly, write about possible alternatives.

Example:

V prvním příkladu je v závorce označeno, na jakou otázku daná informace odpovídá. Ve svém textu to nemusíš takto označovat, ani nemusíš psát ve stejném pořadí – tedy, kromě a) – asi bys měl nejdřív napsat, co to je – ale dávej pozor, abys žádný z bodů nevynechal.

1. This box of chocolates **(a)**was made in Belgium,

but they must have imported **(b)**the cocoa powder from somewhere – probably Africa. The label doesn´t say clearly where the ingredients are from, but I am sure this chocolate involves a lot of „food miles“**(b)**.

There is too much packaging **(b)**, that´s for sure – the paper box and the plastic tray inside.

That wouldn´t be necessary if you just wanted to eat chocolate – you could buy a chocolate bar wrapped in aluminium foil and paper **(c)**.

2. This currants jam was produced locally – actually, my grandma made it. She grew the currants in her garden. It´s fully organic and hasn´t travelled a lot of food miles – only a few kilometers. It´s delicious, too!

3) HW WB 50 51
